

Ballot grid with 50 rows of 20 circles each. Each circle contains a number from 1 to 20, representing a candidate or option. The grid is used for voting by marking the chosen option.

Ballot grid with 50 rows and 25 columns of bubbles. Each row contains 25 bubbles, with some bubbles filled (black) and others empty (white). The bubbles are arranged in a grid pattern, with some bubbles filled and others empty, representing a voting pattern.

Ballot grid consisting of 50 rows and 40 columns of circles. Each circle is either filled (black) or empty (white). The pattern of filled circles is as follows:

Row	Col 1	Col 2	Col 3	Col 4	Col 5	Col 6	Col 7	Col 8	Col 9	Col 10	Col 11	Col 12	Col 13	Col 14	Col 15	Col 16	Col 17	Col 18	Col 19	Col 20	Col 21	Col 22	Col 23	Col 24	Col 25	Col 26	Col 27	Col 28	Col 29	Col 30	Col 31	Col 32	Col 33	Col 34	Col 35	Col 36	Col 37	Col 38	Col 39	Col 40

A 100x100 grid of circles. Each circle has a black border. Some circles are filled with black, while others are white. The filled circles are distributed across the grid in a pattern that appears to be a random or pseudo-random distribution. The grid is bounded by a thick black border on all sides.

Ballot grid with 50 rows of 20 circles each. Each circle contains a number from 1 to 20, representing a candidate or issue. The numbers are arranged in a repeating pattern across the rows.

The image displays a 50x20 grid of circles. Each circle has a black outline. Some circles are filled with solid black, while others are white. The black circles are distributed across the grid in a pattern that resembles a sparse, irregular lattice or a random distribution. The grid is bounded by thick black lines on the top, bottom, left, and right sides.

Ballot grid with 40 rows of 20 circles each. Each circle contains a number from 1 to 40, representing a candidate or issue. The numbers are arranged in a repeating pattern across the rows.

Ballot grid with 40 rows of 20 circles each. Some circles are filled black, representing a completed ballot.

Ballot grid with 50 rows and 30 columns of bubbles. Each row contains a series of bubbles, some of which are filled (black) and others are empty (white). The bubbles are arranged in a grid pattern, with each row having a unique sequence of filled and empty bubbles.

Ballot grid with 50 rows and 30 columns of bubbles. Each row contains a sequence of filled and empty bubbles representing a ballot. The pattern of filled bubbles varies across rows, representing different ballot configurations.

The image displays a 50x50 grid of circles, each with a black outline. The circles are arranged in a regular pattern, with some filled with solid black and others left white. The black circles are scattered across the grid, with a higher concentration in the top-left and bottom-right quadrants. The grid is bordered by thick black lines on the top, bottom, left, and right sides.
