

Ballot grid with 50 rows and 30 columns of bubbles for marking selections.

A 100x100 grid of circles with black outlines. Some circles are filled with solid black, while others are empty. The black circles are scattered across the grid, with a higher density in the center. The grid is framed by a thick black border.

Ballot grid with 50 rows and 30 columns of circles. Each circle is either filled black or empty. The pattern of filled circles varies across the grid, representing a specific ballot configuration.

Ballot grid with 100 rows and 25 columns of circles. Each circle is either filled (black) or empty (white). The pattern of filled circles is as follows:

Row	Col 1	Col 2	Col 3	Col 4	Col 5	Col 6	Col 7	Col 8	Col 9	Col 10	Col 11	Col 12	Col 13	Col 14	Col 15	Col 16	Col 17	Col 18	Col 19	Col 20	Col 21	Col 22	Col 23	Col 24	Col 25

Ballot grid with 50 rows and 30 columns of circles. Each row contains a sequence of filled and empty circles, representing a binary code or ballot data.

Ballot grid with 50 rows and 30 columns of bubbles for marking selections.

The image displays a 100x100 grid of circles, with black borders on the top, bottom, left, and right. The grid contains a pattern of black and white circles. The black circles are located at positions (row, column) where both row and column are odd, starting from (1,1) and ending at (100,100). All other circles are white.

Ballot grid with 50 rows and 30 columns of circles. Each circle is either filled (black) or empty (white). The pattern of filled circles varies across the grid, representing a specific ballot configuration.

A 100x100 grid of circles. Each circle is outlined in black. Some circles are filled with black, while others are white. The filled circles are distributed across the grid in a pattern that appears to be a random or pseudo-random selection. The grid is bounded by a thick black border on all four sides.
